

Level 1 Engineering (Full-Time)

Covering fundamental skills & knowledge common to all engineering practices at NVQ Level One.

There are both practical and theoretical classes providing an introduction to many aspects of engineering such as machining, maintenance, welding, gas cutting as well as units in health and safety, 3D printing, engineering drawing, electronics and communicating engineering information with an Additional group tutorial. You will gain hands on experience in an exciting technology driven industry that plays a large part in everyone's lives.

You will have access to state-of-the-art facilities and work alongside our experienced staff who will guide you in honing your skills and pursuing your passions. By studying mechanical engineering at NPTC group, you will be part of a community of problem solvers and future innovators who are dedicated to making a positive impact on society.

This is suitable for students wanting to become an engineer. Learners may be able to visit Engineering industry as part of the course.

Entry Requirements

Typically you will need 4 GCSEs D and above.

Learners who have not achieved grade C in GCSE Mathematics and English will be expected to attend sessions to support this in addition to their vocational programme.

Career Prospects

Students can continue their studies and progress onto full time level 2 engineering programs or enter into employment and continue to study full time or day release basis if sponsored in a Modern Apprenticeship with a participating employer.

Course Modules

EAL Level 1 Diploma in Engineering Technology modules include an introduction to Working safely in an engineering environment, machining engineering materials, joining engineering materials, electronics,
